BULK STORAGE

ENGINEERED TO PROTECT

With over 20 years of experience in manufacturing, DomeShelter Australia supplies and installs premium fabric structures to the defence, mining and resources, industrial, aviation, agricultural and logistics sectors.

We proudly design and manufacture our structures in Western Australia for use as staff amenities, temporary workshops, warehouses and storage of expensive equipment. We have supplied over 6500+ Structures globally, exporting to over 41 countries worldwide.

DomeShelter Australia has become what we can confidently call the world's most experienced supplier of Container Mounted Fabric Shelters. We have a vision to continually innovate, grow and exceed the expectations of our customers through consistently high standards in customer service and the delivery of durable and fit-for-purpose shelter solutions exported to the world.

DOMESHELTER™ FOR THE DEFENCE INDUSTRY

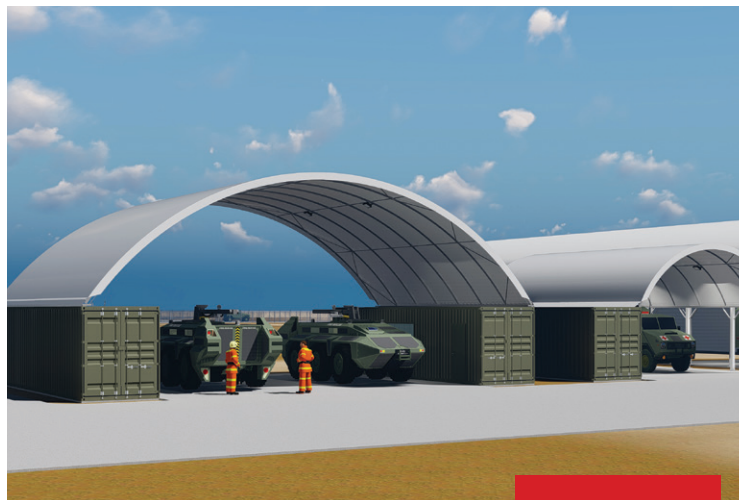

We create customised, fit-for-purpose solutions to meet the changing needs of the Defence industry. Our structures have been used as staff amenities, equipment and heavy machinery protection, aircraft hangars and on-site workshops.

The versatility of DomeShelter™ products enables them to be uninstalled, transported or stored and reinstalled at new sites as required.

No matter what type of structure you require, DomeShelter Australia can design a custom solution to suit with attention to durability, long-term effectiveness and optimum customer support.

DOMESHELTER™ PRODUCTS

The strictest in-house design standards enable our specialist design and drafting team to deliver exceptional services to our clients - on every job.

DomeShelter™ Structures are renowned for ease of installation and relocation across site or off-site. The fabric structure - whether it be standard or custom - is a fit-for-purpose alternative to traditional steel sheds, particularly in harsh and remote environments, making DomeShelter an ideal solution for the Defence industry.

- ✓ Safety for all
- ✓ Made in Australia to international standards of quality
- ✓ Fast manufacturing process with customisation of capability
- ✓ Long term protection from the elements
- ✓ Efficient engineering
- ✓ Easy installation on-site
- ✓ Portable structures for relocation flexibility
- ✓ Cost-effective solutions

CERTIFICATIONS & QUALITY ASSURANCE

All DomeShelter™ Structures are made in Australia, meeting the highest international quality standards for both materials and manufacture. Our structures can be designed to withstand up to Australian Wind Code Region D severe cyclonic wind conditions and come with up to a 10-year warranty.

Engineering Certification

Our products are engineered using the most reliable materials and cover systems available.

All DomeShelter™ Designs comply with Australian Standards AS1170.2.2011.

All welding complies with AS1554 Category SP.

International Quality Assurance

Internationally accredited to ISO 9001, AS4801 and OHSAS18001 which ensures our in-house manufacturing and logistics processes are of the highest standard.

Safety Policy

Because the safety of our workforce, community and clients is a very high priority, our Work Health & Safety Policy sets out all the steps we take to reduce risks and hazards associated with our work.

CONQUERING TOUGH CONDITIONS

Our Shelters can be specifically engineered and structurally certified for each main wind region in the Australian Wind Code. We are well experienced in placing shelters in Australia's highest cyclonic wind regions.

With rigorously tested materials and designs, these durable structures are built to survive the climatic extremes of the Australian outback.

Australia has some of the world's toughest engineering standards, so any shelter built for Australian conditions is assured of suitability in other countries. As a result, DomeShelter™ Branded Shelters have been exported to more than 41 countries in Africa, Asia, South America and the Middle East.

EXPORT & INSTALLATION

Export

All Shelters are specifically designed so they can be packed down in kit form and exported to the remotest regions of the world in standard sea containers. Standard sized DomeShelter™ Kits can be shipped to your site within just days of order and are specifically designed to be easily and quickly installed and dismantled by your on-site team.

Installation

Our shelters are specifically designed to be easily and quickly installed by your own teams with the clear instructions provided. We also have specialised supervisors and installation teams available for those requiring assistance on-site or via phone.

Post-Installation

Our post-installation surveys indicate high satisfaction with the installation process - the instructions provided are easy to follow and telephone support is available throughout the process.
